Education

Sardar Patel Institute of Technology (S.P.I.T)

Bachelors of Computer Science Engineering, Minor in UI/UX

GPA: 7.91

Aug'23 – Jun'27

Mumbai, India

SVP Junior College

Higher Secondary Education (HSC)

Percentage: 84.17%

2021 – 2023

Mumbai, India

Projects

Docker PR Deployment Validator | [Link](#)

LangGraph, Express.js, Node.js, GitHub REST API

- Built an Agentic AI system using LangGraph to detect and fix CI/CD (Docker) failures in GitHub PRs.
- Developed a Chrome Manifest V3 extension + Express.js backend, integrating GitHub Actions API and Google Gemini 2.5 Flash for automated failure analysis.
- Designed a multi-agent pipeline (Planner, Investigator, Fixer, Executor) for log parsing, root cause detection, and AI-generated fix suggestions.
- Implemented real-time PR detection, REST APIs, and automated PR commenting, enabling seamless DevOps workflow with human-in-the-loop validation.

AI-Driven Live Call Insights | [Link](#)

React, FastAPI, AWS (Transcribe, Comprehend), Deepgram API

- Built a Chrome extension that integrates with Google Meet to capture real-time audio streams and provide live transcription overlays for customer service calls.
- Implemented Deepgram's real-time speech-to-text API alongside AWS Transcribe and Comprehend for comprehensive audio processing, sentiment analysis, and entity recognition.
- Developed WebSocket connections for live audio streaming and real-time insights delivery, enabling instant customer service agent assistance during calls.
- Built a React dashboard showing live transcription and sentiment, enhanced with a fine-tuned LLaMA 3.1-8B model for real-time insights and meeting summaries.

Touristo | [Link](#)

React Native, Node.js, MongoDB, Hyperledger Fabric, Langchain

- Built React Native app with Expo, tab navigation, and TypeScript interfaces for Node.js/MongoDB backend.
- Developed AI-powered anomaly detection for tourist safety using route deviation detection, behavior pattern monitoring, geofencing, and restricted area breach detection, with real-time SOS alerts.
- Implemented geo-fencing safety scoring using SerpAPI + RAG (LangChain + Qwen) with dynamic risk alerts, secure location tracking, and blockchain-based tourist verification.

Skills

Languages: Python

Web Development: NodeJS, FastAPI, Keycloak

AI/ML: Langchain, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow

Cloud & DevOps: Docker, Kubernetes, Ansible, Debezium, Dapr, System Design

Databases: MySQL

Positions Of Responsibility

Sports Committee – Head of Logistics

Sep'23 – Jun'25

- Led end-to-end logistics for a national Half Marathon (1,200+ participants) and “Spoorthi” sports fest (2,000+ athletes from 30+ colleges across 10+ sports).
- Managed on-ground operations, ensuring seamless coordination and high-engagement event execution.

Certifications

- JPMorgan Chase & Co. Quantitative Research Virtual Experience Program on Forage.
